

Sprint Starts 11/04/19

Sprint Ends 11/17/19

Sprint Plan: Sprint 4

External Stressors: Midterms:

- CSE 130 Project

(10 hours x 4)

1. (1) As a student, I want to have one person in the house go shopping for everyone else in the house in order to save time.
 - Be able to invite users to lists that are already made.
 - Randomly pick someone in the list to go do the shopping.
- ~~2. (5) As a seasoned shopper, I want to compile my multiple lists from different stores in a single cart so that I can see the total price of my entire shopping cart.~~
3. Bug Fixes
 - Fix profile page not waiting for data from database to load.

Backlog:

- Create friends list in user
 - -> List set up -> pick from friends list
 - -> Put this list ID in each participants list in users
- Be able to select a friend from friends list and invite them to your list, adding the list ID to their user profile.
