

**Sprint Starts 11/04/19**

**Sprint Ends 11/17/19**

# Sprint Plan: Sprint 3

External Stressors: Midterms:

- Midterm for CSE 130

(2 hours)

1. (8) As a social media connoisseur, I would like to be able to interact with my friends and invite them to my shopping lists ~~using popular social~~.
  - Create a 'Friends' button in the profile section and have it route to the friend list UI [US1T1]
  - Creating UI for Friends List [US1T2]
  - Creating a friends array for every user in the 'users' collection (database) [US1T3]
  - Display friends from database onto the appropriate user's friends list[US1T4]
  - Be able to select a friend from the friends list and invite them to your list, adding the list ID to their user profile[US1T5]
2. (5) As a consumer I would like my data to be well maintained and up to date.
  - Get a unique List ID# for each list [US2T1]
  - Delete items in the list and in the Database [US2T2]
  - Fix users in the Database allow for the user to input Display name[US2T3]
  - Profile Page Displays logged in user's Data[US2T4]
  - Have the list view display the lists name, not ID#[US2T5]
3. (5) As a member of a group, I would like to have the ability to add my shopping-mates to the cart so that one person doesn't have to compile everyone's desires.
  - Create a mock store with items sorted into categories[US3T1]
  - Creating UI for adding a new item from the database [US3T2]
  - Get items from the database and put them into a list [US3T3]
  - Create a list array for every user in the 'users' collection to store the lists they belong to (database)[US3T4]
  - Create a logo[US3T5]
  - Display the logo on the login screen(save logo to source files) [US3T6]
4. ~~(8) As a member of a group, I would like to be able to transfer money to the shopper using a popular payment method (like venmo/cash app).~~

Backlog:

- Names of lists
- List ID #
- Fix delete items per list
- Fix users in database
- Profile page must show their data
- Create database collection of items from safeway or any other store.
- Create friends list in user
  - -> List set up -> pick from friends list

**Sprint Starts 11/04/19**

**Sprint Ends 11/17/19**

- ->Put this list ID in each participants list in users
