Sprint Report #1

Actions to stop doing:

- Waiting until the last day to start completing tasks, since it's very difficult to finish the entire sprint if we only get things done the day before it's due.
- We should also stop letting our meetings go too long since we don't end up getting much done during the meetings and they don't really have any direction.

Actions to start doing:

- Taking initiative when doing tasks on the scrum board, since it slows down the whole process if no one has a starting place.
- We should also stick to a specific time for every meeting and not push back the time. Having a plan for our meeting rather than just show up to a meeting.
- Making sure we know how long we have to complete tasks
- Having an understanding of what everyone is working on.
- Reasonable goals
- Ask when you need help with your task

Actions to keep doing:

- Keep communication going through discord.
- Learning about the tech we are using.
- Using source control.
- Using google.com for things we are unsure about.
- Going through documentation when stuck

Work completed/not completed:

- We completed the user interface of our application.
- We did not complete tasks about learning how to use the database (like setting up the archive).

Work completion rate:

77%
User stories completed: 1
Ideal hours: 51.25
days in sprint: 11
